

YAMUNA BANDLA

GCP DevOps Engineer

Mobile: +91 8341993352 | Email: yamunabandla2026@gmail.com | Hyderabad, India

EXECUTIVE SUMMARY

DevOps Engineer with 4+ years of experience supporting cloud infrastructure, CI/CD automation, and application deployment on Google Cloud Platform (GCP). Working knowledge of Infrastructure as Code using Terraform, and hands-on experience setting up CI/CD pipelines with Jenkins, Bitbucket, and Maven to automate build, test, and deployment steps. Familiar with containerizing applications using Docker and deploying to Google Kubernetes Engine (GKE). Comfortable configuring GCP networking basics (VPC, Subnets, Firewall, NAT), managing access through IAM, and monitoring system health using Cloud Monitoring and Cloud Logging. Used to working in Agile teams, troubleshooting deployment issues, and supporting production systems to keep them reliable and running smoothly.

TECHNICAL SKILLS

Cloud Platform:	GCP – Compute Engine, Cloud Storage, VPC, Subnets, Firewall, NAT, IAM
Containers & Orchestration:	Docker, Kubernetes (GKE) – working knowledge
Infrastructure as Code:	Terraform
CI/CD & Automation:	Jenkins, Bitbucket Pipelines, GitHub Actions (basics), Maven
Monitoring & Logging:	GCP Cloud Monitoring, Cloud Logging
Code Quality & Analysis:	Sonar Cloud
Testing & Documentation:	Postman, Swagger, OpenAPI Spec
Scripting & Languages:	Shell scripting, SQL, YAML, XML, Basic Python, Basic JavaScript
Version Control:	Git, GitHub, Bitbucket
Project Tracking:	JIRA (Agile/Scrum)
Certifications:	GCP – Associate Cloud Engineer (Google Cloud Platform) HashiCorp Certified – Terraform Associate (003)

WORK EXPERIENCE

PRODAPT SOLUTIONS PRIVATE LIMITED <i>DevOps Engineer</i>	Dec 2021 – Present
Client: Lumen Technologies	Sep 2024 – Present
- Supported migration of backend services to a modernized architecture on GCP, helping ensure compatibility, minimal downtime, and improved performance. - Provisioned and maintained core GCP infrastructure – VPCs, Subnets, Firewall rules, and NAT gateways – using Terraform, enabling consistent, repeatable environment setup. - Built and maintained CI/CD pipelines using Jenkins and Maven, automating build, test, and deployment steps and reducing manual release effort. - Containerized application components using Docker and assisted with deployments to Google Kubernetes Engine (GKE). - Applied basic security controls such as OAuth 2.0 and API key validation to help protect cloud-hosted services. - Set up rate-limiting and traffic management rules to help manage load and prevent service overuse. - Helped improve deployment speed by ~20% through pipeline tuning and configuration cleanup. - Monitored system health using GCP Cloud Monitoring and Cloud Logging, and assisted with troubleshooting to reduce downtime. - Supported onboarding and access management for applications, helping keep provisioning smooth for new services. - Worked in Agile teams using JIRA, taking part in sprint planning, daily stand-ups, and release tracking.	
Client: Hyperoptics – British Telecommunication Company	May 2022 – Aug 2024
- Deployed and configured 50+ backend services on GCP, helping ensure scalability and steady performance. - Automated deployments using Bitbucket Pipelines and Maven, reducing deployment time by ~30% and improving release turnaround. - Used Terraform (Infrastructure as Code) to provision GCP infrastructure in a consistent, repeatable way across environments. - Got hands-on exposure to Docker for packaging application components for deployment. - Implemented basic security measures including authentication, OAuth 2.0 integration, and CORS configuration. - Configured caching and traffic-shaping rules to help improve system responsiveness under load. - Built reusable deployment configurations to cut down on duplicated setup work across services. - Ran code quality checks using Sonar Cloud to help keep deliverables clean and production-ready. - Assisted with onboarding, versioning, and basic monitoring tasks across the service lifecycle. - Worked in Agile teams using JIRA, contributing to sprint execution and day-to-day delivery.	

EDUCATION

Bachelor's – Electronics and Communications Engineering Guntur, Andhra Pradesh	2017 – 2021
